

Oil & Gas
Drilling & Production

MASTER CONTROL PANELS

Our panels can be outfitted with Ethernet connectivity for minimal downtime and Programmable Logic Control (PLC) customization to support the most rigorous and demanding applications. Currently, our MCPs are used in some of the most intensive drilling and exploration areas in the world.

Features & Options

- BOP stack.
- Diverter.
- Choke & Kill functions.
- Any other customer - specific functions.

MASTER CONTROL PANELS

Master Control Panels are the primary source of control throughout the entire drilling and extraction process. At Pantex Ennerflo Systems, we design MCPs to control various elements.
